### **Móz Designs' New Skinz Collection Takes Design Cues from Nature**

The Skinz Collection couples rich, organic finishes with industrial-grade durability

(Oakland, CA) August 2021 — Award-winning metal experts, [Móz Designs](#), are excited to introduce the new Skinz Collection, a line of metal panels capturing the texture and depth of earth's natural materials. Made from solid-core aluminum laminated with architectural-grade embossed vinyl films, Skinz takes on the appearance of decorative metals, wood, and stone. As the design industry continues to seek out rich, natural textures in hospitality, education, healthcare, and corporate environments, the Skinz Collection offers a light-weight, cost-efficient opportunity to bring these grounded textures into shared spaces.

“The warm, organic look of the Skinz Collection complements any design aesthetic and sets the tone for welcoming communal spaces,” says Tripp Sandford, Co-Founder of Móz Designs. “As we enter a new chapter in our health-conscious world, offering a sense of comfort while rising to the new standard of cleanliness and stability is a crucial component of design.”

## Metals + Architectural Products

The Skinz Collection launches with six new designs—Charwood, Wenge Wood, LunaGold, Aged Bronze, Aged Gold and Glacier—providing architects and designers more opportunities to bring natural textures into commercial spaces through design-forward columns, walls, and partition solutions. Skinz’s durable aluminum panels also accommodate new health and safety standards and heavy-duty cleaning products with their smooth, easy-to-clean surfaces.

Skinz’s six colorways can also be transposed onto Móz’s signature Corrugated metal panels. Optimizing movement and depth, Móz’s Corrugated metal panels give new life to the traditionally industrial material. Available in all of their color collections and finishes, Móz illustrates the softer side of Corrugated metal.

Designed with 100% recyclable aluminum, one of the most sustainable materials in the world, the Skinz Collection contributes to Móz’s effort to reduce their carbon footprint and provide specifiers with more sustainable options throughout the design process.

Solid core aluminum sheets are available in a variety of thicknesses ranging from .040" to .125". Corrugated options are made from solid core aluminum [ASTM B209] available in .040" sheets. Standard sheet sizes are 47" x 96" and 47" x 120" and corrugated panels are available in 44-1/4" x 96" and 44-1/4" x 120" sheets.

## **About MÓZ Designs**

### **Metals + Architectural Products**

MÓZ designs and fabricates architectural metal sheets, columns, ceilings, walls, and room dividers in Oakland, CA. Using a unique balance of color, texture, and grain, MÓZ redefines metal surfacing materials to create architectural metal products for commercial, hospitality, workplace, transportation, entertainment, and retail markets, from large-scale exterior installations to easy-to-assemble products and surface applications. MÓZ's innovative products, solutions, and dedication to customer service help designers achieve their vision on time and on budget. The MÓZ business, a wholly-owned subsidiary of Armstrong World Industries since August 2020, operates independently but collaboratively with AWI.
